An ISO9001 certified company

## **Terms and Conditions**

### **Delivery Date and Effective Period**

SAS Manufacturing, Inc. (SAS) as a printed circuit board (PCB) assembly and manufacturing service company whose product is typically just one element in a larger system, understands the need to maintain promised delivery schedules. The delivery and pricing indicated by this quotation or proposal will remain firm for orders that are placed within thirty (30) days of its submission, unless otherwise stated. This period may be extended in writing upon request.

### **Basis of Pricing on Turnkey Material**

Due to the volatile nature of some commodities, such as obsolescence, discontinuance, price changes, and availability, SAS may require re-pricing of the material portion of an assembly. Such re-pricing will not normally occur without prior customer notification, and unless the overall material cost has increased by more than 2%. Specific exceptions to this term may be negotiated.

### **Basis of Pricing on Customer Furnished Material**

The assembly prices quoted are based on the use of tape or reel for all axial leaded components. Pricing may also be subject to change upon receipt and inspection of printed circuit boards and large or exotic components that may have an unusual impact on assembly time.

### **Delivery Terms**

Unless stated otherwise, the FOB point is Corona. The standard terms are to Prepay and Bill for freight charges. Any special packaging, such as anti-static containers, or conductive bags must be supplied by the customer, or as agreed to separately in writing.

### **Limitations on Liability**

SAS does not accept liability beyond the direct value of the goods and services that it provides. No warranty, whether expressed or implied, extends to any other equipment, or process. No guarantee as to fitness or safety applies, nor is SAS liable in any way for incidental damage resulting from a defective component or service. In the event that a component or service is found to be defective, SAS's liability will be limited to suitable rework of the item.

### **Warranty on Material and Workmanship**

SAS warrants all of the assembled products it provides, for a period of ninety (90) days from the date of shipment, to be free from defects in workmanship. The customer has the responsibility to perform any requisite inspection and testing within this allotted timeframe to preserve its recourse to return such item for repair. All of the components furnished by SAS will be supplied in accordance with the standards and specification requested by the customer. The original manufacturer's own warranty will be passed on to the customer during the warranty period. SAS will replace components only on assemblies for which the material was supplied by SAS. Prior material return authorization (RMA) is required for all returned items

### **Confidentiality**

All customer furnished materials and submissions will be treated by SAS and its employees as proprietary and confidential to the customer. This will extend to, but is not limited to, any custom components, proprietary designs, transmissions, and communications relative to application or content of the customer's product. Information that is already commercially available or within the public domain is not similarly safeguarded.

### **Customer Furnished Kits**

The customer has the responsibility to provide complete kits in a timely manner that will permit a reasonable period for the scheduled assembly work to be performed. Such kits are to contain 5% overage to accommodate normal production shrinkage and repair. ESD bags should also be provided. Overages may be returned to the customer upon assembly completion. Partial kits are permitted provided that the time to completion does not extend into the time frame allotted for the production cycle. Component count of received goods is audited by SAS; and quantities are accepted as marked on the packaging. Production interruptions caused by shortages may necessitate line changeover and restart, and therefore may incur an added setup charge of up to \$ 250.00.

### **Partial Shipment**

SAS will normally schedule deliveries and invoicing in accordance with the customer's requested timetable. However, in large or protracted deliveries, or where customer caused delays occur, SAS reserves the right to partial ship and invoice whenever the value of goods and services in suspense exceeds \$ 1,500.00.
